

Ahh-Some Hot Tub & Jetted Bath Bio-Cleaner

Ahh-Some Hot Tub & Jetted Bath Bio-Cleaner™ is a dual-purpose cleaning product that is used for hot tubs and jetted whirlpool Jacuzzi baths. Jetted tubs can harbor bacteria, algae, dirt, sediment, soap, cosmetics, lotions, hair, and other bio products that can dramatically affect how your tub performs and how the water quality is affected. Jetted Bathtubs can be a breeding ground for a host of nasty critters that can stain your tub, create foul odors and make the shell look unsightly. Many people use bleach and detergents to clean jetted tubs. This has proven to be clinically very ineffective. Some manufacturers tell customers to use dishwasher detergent and or with bleach in the tub to clean the infrastructure and jet assemblies. Again, this is not effective. What is very effective is our Jetted Bath Secret. One 2 ounce container is enough cleanser to clean the average 60-80 gallon jetted tub for about 3-4 months, depending on the bathing load.

Jetted Bath Instructions:

Here is what you do: Initially, add 1 level teaspoon, no more, to a jetted tub that is filled to the approximate level of water that you normally fill it. Simply take the gel and swish it around in the water so it partially dissolves for a few seconds. Run the jets for 5-10 minutes. This will further dissolve the gel and allow it to circulate through the system. You will notice foam. This is NORMAL. Too much gel will foam too much, so only use a level teaspoon at any cleaning.

In a matter of minutes you will see a brown and black fleck film appearing on the surface. This is the gunk we are cleaning from your enclosed system. This is Good! This is the stuff that was caked up and clogging the plumbing infrastructure for months or years.

Drain the water from the vessel. Ahh-Some Hot Tub & Jetted Bath Bio-Cleaner is sewer and septic tank safe and will actually help clean those pipes as the water and gunk exit your plumbing system. The gel is remarkable. Be sure to clean the tub every week, or as needed depending on the bathing load. There are 8 level teaspoons of gel in the 2 ounce container and 24 level teaspoons in the 6 ounce container.

Helpful Hints: If you travel and go to hotels that have jetted tubs, add a dab to the tub like you do in your own home. Get rid of all the bacteria, algae, and the plethora of other gunk and enjoy your jetted bath away from home. Yes, you can safely fly with the gel on a plane. It is a natural, environmentally friendly cleaning and degreasing formula. Tell your friends and neighbors about the product. It is a sad thing that many jetted tubs have never been cleaned. When you use our gel your jetted tub will actually be cleaner than new. We guarantee it!
